

Plateau Archaeological Investigations is proud to announce that we now offer underwater archaeological services. We are staffed, equipped, and insured to help with all aspects of your cultural resources survey, including riverine and inundated reservoir resources. Our staff is well versed and experienced in Plateau archaeology and history. In addition, our dive lead has been formally trained in maritime history and archaeology and has performed more than 125 dives while surveying and recording archaeological sites. While underwater archaeology is often associated with coastal settings, it is also applicable in riverine and reservoir environments.

SERVICES PROVIDED

- Shoreline and underwater reconnaissance, survey, recording, and testing
- Site impact identification and processes analysis
- Archaeological site management

POTENTIAL RESOURCES

- Inundated prehistoric and historic sites and settlements
- Portage locations and ferry landings
- Fishing weirs and fishing stations
- Shipwrecks and plane wrecks
- Isolated features and artifacts

CONSIDERATIONS

- Boat launch construction and maintenance
- Reservoir management
- Bridge construction
